About me

Passionate full-stack developer specializing in web application development, Craft practices (TDD, BDD, Clean Architecture...), and gamification, with nearly 10 years of experience.

My preferred stack is based on TypeScript, primarily using React for the frontend and Node for the backend. I also have experience with Angular and Java backends, and I'm always eager to explore new technologies.

I also enjoy mentoring and training junior developers to help them grow their skills.

Skills

JavaScript | TypeScript

node.js | Express.js | NestJS

React | Tailwind CSS | Radix UI

PostgreSQL | Prisma | TypeORM

GitLab CI | Docker | K8S | AWS

Jest | Testing Library | Cypress

Java | Spring Boot | Gradle

TDD | Pair/Mob Prog. | DDD

Clean Archi. | Hexagonal Archi.

French | English
